

Overland Hike Data Policy

As part of the safe and efficient running of the Overland Hike we will collect and store data relating to your son / daughter. Further explanation on the use and storage of the data can be found in the notes below:

- The data that you submit will be held in a database on a secure computer server that is located within the UK.
- The data will be collected by your son / daughters Scout / Explorer Scout leader.
- The data you submit may be shared for use in other Scouting activities.
- The data will not be shared outside of Scouting.
- The data stored electronically is the same as the data shared on the 'Overland Hiker Information Form' that parents / carers must complete for their son / daughter to take part in the Overland Hike.
- The electronic data will be held until the young person reaches the age at which they leave their current section. This means a Scouts data will be removed when they reach fourteen and a half years old. An Explorer Scouts data will be removed when they reach eighteen years old. The retention of data for this time period allows the organisation to ascertain if a young person has competed in the Overland Hike previously and therefore if their team is eligible to compete for the 'Novice Trophy'.
- If you wish your son / daughter's data to be removed from the database after the hike please email info@overlandhike.com
- If you wish to see the data held on your son/daughter please contact info@overlandhike.com
